ARTY ALPHABET!

This half term you are going to create an arty alphabet based on what you have access to at home!

You can use objects you find at home, or on local walks when you go out, or if you are struggling to find objects, you can use google images to look objects up! You can choose a theme, such as ‘Food,’ or, ‘Toys,’ or ‘Dogs.’

Here is an example of a dog breed alphabet and a food alphabet, if you are struggling at all, you can of course copy from the examples!
Start by making your first row of letters! Remember your fantastic drawing skills and start by pressing very gently with your pencil and build up the tone, only when you are happy that your drawing is accurate.

Week 2

Try and keep each sketch quite small and illustrative, individual letters can differ in scale (size) so don’t worry about measuring them out. Keeping them all at a small size you should have time to get through a full alphabet. You can use just pencil, or, if you have other equipment at home, feel free to be creative and use what is available to you.

Week 3
Refresh yourself with these shading techniques before you add any tone to your drawing. You should have a practice with each technique before applying this to your work.

- Stippling
- Scumbling
- Shading
- Smudging
- Crosshatching

Check again that your lines from last week are as accurate as they can be and spend about 5 mins making any adjustments.

- Spend ten minutes reminding yourselves of these shading techniques. Identify the lightest parts of the work and remember to leave them white.
- Work your way through the lighter tones pressing lightly as you shade.
- Remember to shade evenly, so build up tones gently using hatching and cross hatching.

Return to your Arty Alphabet!

Check again that your lines are as accurate as they can be and spend about 5 mins making any adjustments.

- Spend ten minutes reminding yourselves of these shading techniques. Identify the lightest parts of the work and remember to leave them white.
- Work your way through the lighter tones pressing lightly as you shade.
- Remember to shade evenly, so build up tones gently using hatching and cross hatching.
- It's really important that you leave the light bits light! Take care not to overshad!

Week 4

Reflect on your drawing by annotating next to it or underneath, wherever you have space. Explain what you enjoy, found easy and what you are most pleased with.

Week 5

Continue working on your Arty Alphabet!
Remember to use the excellent drawing skills you have used in the past. You should be close to completing your Arty Alphabet by now if you have managed your time well!

Week 6

You should be completing your Arty Alphabet now! Go back and check that your work is of a good standard and well presented.

Reflect on your drawing through annotation, see Art week 4 for advice.

Stretch!

*If you have finished your Arty Alphabet well done! Try illustrating the numbers from 110 in the style of a childrens learning to count poster!*
