### KS2 Laptops

Dear Parent/Carer,

Kings Primary initiative for every child in Key Stage Two to have their own personal laptop device has been a huge success.

Thanks to your support and the brilliant attitude to learning of the children we were able to deliver lessons to each child during lockdown and set work for children to complete on various platforms, such as Seesaw, Purple Mash, Mathletics and Times Table Rock Stars.

We are passionate now that these devices do not now get forgotten and that we integrate them into our curriculum each day as well as for their home learning. We wanted to give some guidance regarding the care of the laptops and remind children that **laptops must be in protective cases and school bags when travelling each day.**

All the children have been allocated a protective sleeve and charger to go alongside their laptop. These are vital and add much needed protection to the devices to protect them e.g. if they are dropped.

With this in mind, we ask the children to ensure that the devices are always kept in these sleeves when not in use. If this sleeve is damaged or lost, then we would ask that it is replaced as soon as possible. The sleeves are 12" in size and can be cheaply purchased from various places such as on Amazon or in local shops such as B&M Home Bargains, Wilkinsons and various pound stores.

If you have any concerns about the laptops or sleeves, please get in touch and we can resolve any issues as soon as possible.

Yours sincerely,

Mr D Scott.  
Digital Strategy Lead.
